

WE ARE HIRING

SCIENTIST R&D (M/F/D)

LOCATION: POTSDAM / BERLIN

WHY YOU'LL WANT TO JOIN THE TEAM:

- Flexible working hours with different working time models
- Employee discounts for selected providers
- Weekly fresh fruit and yoga
- A workplace with its own parking spaces and good public transportation (not far from Potsdam main station)
- Modern working environment with home office options
- Opportunities to expand existing knowledge or learn new things (e.g., language courses)
- Regular company events to guarantee a stable working atmosphere
- Beverages and coffee specialties are always available
- An uncomplicated and flexible vacation planning, which also makes it possible to take advantage of last-minute offers

RESPONSIBILITIES:

- Development of innovative products for veterinary and food diagnostics
- Documentation and transfer of project results according to industry standards
- Project-related communication with internal departments and external partners
- Research of new initiatives and contribution to key R&D decisions

PROFILE:

- Completed studies in biotechnology, molecular biology or comparable degree
- Extensive knowledge in the analysis of sequence data
- Experience in handling microorganisms
- Ideally already practical experience with NGS techniques
- Pleasure in designing innovative products independently and constructively
- Process-oriented and analytical way of working
- Very good command of written and spoken English

WHO WE ARE:

We create innovative diagnostics for a healthier world. As representatives of the One Health approach, we are convinced that the health of humans, animals and the common environment are interconnected. Specializing in food safety throughout the value chain, we develop, distribute, and improve rapid molecular tests and analysis tools. Our solutions are reliable, easy to use and correct – to make the world a safer place.
